

RideWithMe Vision Statement

For all passengers who need to catch a ride or drivers who look to take others on a ride on their way, RideWithMe is a platform that allows you to publish and search for rides on the roads. Unlike Waze Carpool and other apps that offer direct routes from a starting point to a destination, RideWithMe connects between drivers and passengers and offers the fastest route, whether direct or with multiple drivers. In addition, it allows creating groups for carpooling.
